The civil rights movement in the United States was a decades-long campaign by African Americans and their like-minded allies to end institutionalized racial discrimination, disenfranchisement and racial segregation in the United States. The movement has its origins in the Reconstruction era during the late 19th century, although it made its largest legislative gains in the mid-1960s after ...

Race is genetically determined and refers to one's ancestry. Ethnicity, which refers to people's common traits, background, and allegiances (developed because of culture or religion), is learned from family, friends, and experiences. Only a small percentage of human genetic variation is due to racial differences; much more variation occurs between individuals within such groups.
