evaluated in terms of elementary functions. 1.4 First-Order Linear Equations 1. Find the general solution of the following equations. (a) The equation is linear and separable. The integrating factor is  $e^{-x/2}$  so it simplifies to  $(e^{-x/2}y)' = 0$  and  $e^{-x/2}y = C$ . Therefore,  $y = Cx^{2/2}$ . (b) This equation is also linear and separable. The ...

In mathematics, a negative number is a real number that is less than zero. They are often used to represent the magnitude of a loss or deficiency. A debt that is owed may be thought of as a negative asset, a decrease in some quantity may be thought of as a negative increase. If a quantity may have either of two opposite senses, then one may choose to distinguish between those senses—perhaps ...
