Machine learning is a large field of study that overlaps with and inherits ideas from many related fields such as artificial intelligence. The focus of the field is learning, that is, acquiring skills or knowledge from experience. Most commonly, this means synthesizing useful concepts from historical data. As such, there are many different types of learning that you may encounter as a

The difference between superficial and deep learning is an important one; it can appear as though a child has produced a lot of work, but it is possible that they are completing the tasks set rather than being shown how they can be deeply learnt. The route to deep learning and expertise is, to quote Tim Oates, fewer things in greater depth ...
