You can spend a lot of time just on these illustrations alone. The book starts off with chapters on three deciphered (more or less) languages: Egyptian hieroglyphs, Linear B, and Mayan glyphs, and describes how these languages were finally solved. Problems arise because some languages are based on logograms, where a symbol represents a word (e.g. "man"), some have symbols representing a syllable, and some have symbols representing just a letter--a part of a syllable--as in English.
