### Plumbing Guide

Most unfinished basements have minimal plumbing, while finished basements can have almost as many plumbing fixtures as above-ground spaces in your home. Plumbing elements that are unique to basements may include: main water supply line; floor drain; laundry sinks and washing machine; water supply to furnace humidifier; outdoor faucet water supply lines

### The Ultimate Plumbing Guide - Everything You Need to Know

Plumbing Basics. Your home's supply and drainage system must always be two distinct subsystems, with no overlapping. At the fixtures (bridges between the two systems), the air admitted by the vent stack and vent pipes keeps the traps sealed and prevents sewer gases from backing up through the drains.

### Plumbing Basics | HowStuffWorks

In order to explain how the sewer gas may enter a house through a plumbing fixture, it is necessary to clarify the function of traps and vents. Every plumbing fixture is the terminus of the city water supply system and the beginning of the city sewerage system. The faucets control the water supply. The traps and vents control the sewer air.

### Plumbing Handbook - thePlumber.com

plumber check your entire plumbing system. 0 If your house is heated by hot water or steam, drain the heating pipes and boiler before leaving. Burners and pilots should be completely out and the main water supply turned off. 0 Drain off the water from the boiler by opening the draw-off valve at the lowest point in the system.

Plumbing is all about pipes and fittings. Pipes establish the runs that bring or take water, with fittings controlling and manipulating the flow. Pipes are simple enough: they're straight, and come in different sizes. Pick the right material and length, and you're pretty much good to go. Fittings - for a plumber - are much the same.

### Guide to Fitting Types & Materials

Plumbing is the most complicated aspect of most bathroom and kitchen remodeling projects. To prevent dangerous and unhealthy conditions, plumbing must conform to building codes. The National Uniform Plumbing Code applies generally to the entire country. You must also follow local codes, which could be more stringent.
